

Target Setting and Monitoring

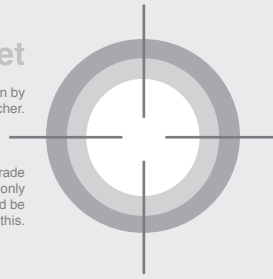

Record your progress over time.

This page should be used to keep a summary of your assessment achievement over the length of your course. This is where you keep a record of the topics that you're ace at, the ones that went okay, and the ones you suck at. This will help you plan your revision.

Formal Target

Write the target grade that you have been given by your teacher.

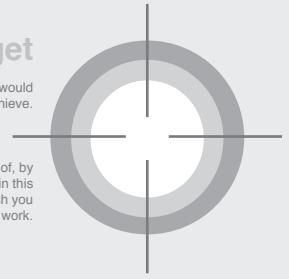

Don't forget that this is the minimum grade expected of you at the end of the course and only represents a grade a computer thinks you should be able to achieve, plan to go above this.

Personal Target

Write the ambitious target grade that you would like to achieve.

Because you know what you're capable of, by putting an ambitious, but achievable, target in this box your teacher will know how far to push you when marking assignments and work.

Topic	Mark	Grade
